ROAD RESTRICTIONS NOTICE #7 June 22, 2022
for the Prince George Natural Resource District (including Robson Valley)

Effective immediately, all seasonal road restrictions are rescinded. Permanent or temporary road closures remain in effect.

The road restrictions are established to limit the use of heavy loads on FSRs during periods when the road surface and subgrade are susceptible to damage. Road users are reminded of their obligations under Section 10 of the Forest Service Road Use Regulations:

Damage to roads

10 (1) *A person must not use a forest service road or operate or cause to be operated a motor vehicle or other equipment on it in a manner that damages the forest service road.*

(2) If damage results to a forest service road as a result of a contravention of subsection (1), the district manager may, in addition to any other remedy available at law, order the person who committed that breach to pay to the government the reasonable costs of the repair.

Road users should anticipate road restrictions of up to 50 percent of legal highway axle loading. If damage continues, the District Manager will consider closing the FSR to industrial traffic. For more detailed information on MOTI load restrictions, please visit the MOTI webpage.

[MOTI-Load Restrictions.](#)

Exemptions may be considered for specific sections of FSRs that are pre-determined to have all-season load bearing characteristics. Applications for such exemptions must be applied for in writing early to the District Manager, and associated with pre-considered operational strategies and rationale of how damage will be prevented and/or incurred damage will be mitigated. The District Manager may require a professional sign-off of all road use, repair plans and final mitigation.

for and on behalf of,
John Huybers, RPF

District Manager
